

RAHEEB-UR REHMAN

N8N AUTOMATION DEVELOPER | AI WORKFLOW ENGINEER | FULL-STACK DEVELOPER

Lahore, Pakistan • raheebrehman29@gmail.com • +92 310 4430179

linkedin.com/in/raheeb-gill • github.com/raheebgill29 • app.homedash.co.uk

PROFESSIONAL PROFILE

Automation-focused full-stack developer with 4+ years of experience building production web, AI, and workflow systems. Specializes in n8n workflow design, self-hosted deployments, webhooks, API integrations, Postgres, JavaScript/Python Code nodes, AI agents, structured LLM output, and production-minded controls such as validation, consent, idempotency, suppression logic, retries, audit trails, and human handoff. Also brings strong Next.js, React, TypeScript, FastAPI, Azure, and database experience for teams that need automation connected to real products.

N8N AUTOMATION EXPERIENCE

Freelance / independent project work focused on reliable business automations, AI-assisted workflows, and integrations between APIs, CRMs, databases, spreadsheets, and communication systems.

Dealership Lead Follow-Up System | [n8n](#), [Webhooks](#), [JavaScript](#), [Data Tables](#), [SMS workflow design](#)

- Built separate outbound and inbound flows for lead intake and customer replies, with normalized data and structured status tracking.
- Validated consent, prevented duplicate events, checked permanent suppression lists, respected each customer's local contact hours, and re-checked suppression before follow-up.
- Matched inbound replies by phone number and classified them as Interested, Not Interested, Opt-out, or Unclear, then routed each outcome to the correct dealer queue, suppression list, closed-follow-up list, or human-review queue.
- Added delayed follow-up logic, voice-fallback protection, audit logging, and operational state tracking through n8n Data Tables.

Competitor Content Intelligence Workflow | [n8n](#), [OpenAI](#), [APIs](#), [async polling](#), [Google Sheets](#)

- Built a 50+ node workflow that resolves and deduplicates competitor lists, loops through each competitor, retrieves content through APIs, and routes image, video, and carousel jobs by content type.
- Handled slower API jobs with asynchronous polling, used an OpenAI AI Agent to analyze content, enforced structured schema-based output, merged results, and logged the live report to Google Sheets without manual cleanup.
- Designed the workflow for scale, observability, and reliable processing across multiple competitors and content formats.

Self-Hosted n8n Automation Lab | [Docker Compose](#), [Postgres](#), [Cron](#), [Postgres Trigger](#), [HTTP Request](#)

- Built and tested local n8n/Postgres workflows for stale listing flagging, database-driven checks, branching logic, and controlled updates using Docker Compose.
- Applied production hygiene around credential storage, separate environments, workflow exports, error handling, read-only reporting patterns, and safe database changes.

TECHNICAL STRENGTHS

Automation: n8n, self-hosted n8n, Docker Compose, Webhooks, Cron/Schedule, Postgres Trigger, HTTP Request, expressions, IF/Switch, Merge, Loop Over Items, Code node (JavaScript/Python), AI Agent node, Data Tables, Google Sheets, Slack, API authentication, async polling, validation, idempotency, retries, suppression and routing logic.

Web / Backend: Next.js App Router, React, TypeScript, Tailwind CSS, shadcn/ui, FastAPI, NestJS, Node.js, REST, GraphQL, WebSockets, Supabase, PostgreSQL, Prisma, Cosmos DB, MongoDB.

AI / Cloud / DevOps: Azure OpenAI, Azure AI Search, OpenAI API, GPT-4o, DeepSeek, Llama, LlamaIndex, RAG, ReAct agents, AWS EC2, Azure App Service, Docker, Vercel, Git, CI/CD-aware workflows.

PROFESSIONAL EXPERIENCE

Frontend Developer - Next.js | LoudlyDev Global Solutions

Jan 2026 - Present

- Translate Figma designs into pixel-accurate, responsive Next.js interfaces and integrate backend APIs while collaborating with designers and backend engineers.
- Build reusable component architecture and optimize rendering performance using clean, scalable Next.js practices.
- Delivered 8+ production sites on the RB Car Company template, plus real-estate and automotive listing platforms.

Full Stack Developer - Next.js / Python / Azure | Synoptix AI (Australia)

Jan 2025 - Dec 2025

- Built ReAct agents for blog generation, code writing, and FAQ assistance using Azure AI Search with Azure OpenAI, DeepSeek, and Llama.
- Integrated Cosmos DB for chat persistence, built the frontend against FastAPI, implemented Guest/User/Admin access control through Azure/GraphQL, and shipped the product as an Azure Marketplace application.

Full Stack Developer | Karbon Ion

Nov 2022 - Dec 2024

- Built a full-stack RAG platform for a German enterprise client using Python, Next.js, and LlamaIndex, and delivered a React/Spring Boot teacher portal for a Portuguese university.
- Developed a NestJS blogging platform, a Next.js PWA chat application, React Native billing and travel apps, and 5-8 client e-commerce sites including Darwaza.

SELECTED PRODUCT PROJECTS

HomeDash - Multi-Tenant Property Management SaaS | Next.js, Supabase, OpenAI, Stripe, SendGrid

Built a multi-tenant platform with AI-powered maintenance coordination, tenant communication automation, lease tracking, owner reporting, and integrations for property operations.

Curio - AI-Powered Educational Toy Backend | FastAPI, PostgreSQL, GPT-4o, OpenAI Realtime API, WebSockets, AWS EC2

Built a production-grade voice AI backend for children ages 3-8 with full-duplex WebSocket voice sessions, server-side VAD, and barge-in interruption handling.

CERTIFICATION & EDUCATION

n8n Level 1 Certification n8n Academy / n8n

BS Computer Science University of Lahore | Feb 2021 - Jan 2025

FSc, Pre-Engineering Punjab Group of Colleges | Aug 2018 - Mar 2020
